

*John Anderson Professional Services Ltd. drew the plans for our two-storey extension, wc, internal alterations and detached garage in March 2013. The plans were of excellent quality, were suitably detailed and drawn up after the proposed details were explained and then discussed with us. John was sensitive to cost constraints and always had a weather eye on where money could be saved without compromising on quality. It was very affirming to have an experienced professional on hand to help us through the initial, crucial stages.*

*John Anderson delivered quickly and within budget. Building Regulations were passed without a hitch and John was on hand to answer questions from on-site builders. From the outset, John was courteous and professional. He even answered the phone whilst on holiday on a canal boat! His helpful nature and service was shown again when I needed extra plans; John provided them without fuss on the same day.*

*John's insightful knowledge of the building industry, up-to-date materials and regulations proved itself since we are very happy with our finished build and the stress-free nature of the planning. I would like to recommend John Anderson to any potential customers who need a professional honest opinion, value for money and quick service.*

*Stuart Motson (Teacher, Wyedean School, Chepstow)*
